

EduFor Innov@tive Classroom Lab is a Edufor Training Centre Project. EduFor is an Association of School within the following municipalities: Nelas, Mangualde, Penalva do Castelo, Sátão and Vila Nova de Paiva – headquarters at Felismina Alcântara Secondary School, in Mangualde, **Portugal**. Last 10th May, 2016 it was inaugurated **a learning space that offers two classrooms containing six learning areas**, also an easy access to an auditorium wich may hold major learning activities and seminars.

Forty Stakeholders take part in this **partnership**, which is used for **teacher training** (not only nationals) **and pupils** as well, **in a classroom basis** (regular syllabus and special needs). EduFor Innov@tive Classroom Lab is inspired in "Future Classroom Lab", designed by European Schoolnet, placed in Brussels.

This is an **Innovative Learning Environment** which challenges its users and visitors to rethink technology supporting role, the design and devices used in their own classrooms. It embraces teachers and pupils, several enterprise partner members and other professional Educators (higher education, associations, projects, etc.) its goal is to **develop insights on the School of the Future** and **strategies on how to make them happen**. EduFor Innov@tive Classroom Lab is aligned with AEI **network** (DGE/Portugal), as well as with **European Schoolnet FCL network**.
